## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/7/2009 has been entered.

### ***Response to Arguments***

Applicant's arguments filed 7/7/2009 have been fully considered but they are not persuasive. The applicant's arguments are not persuasive. The applicant seems to be avoiding the fact that the applicant's disclosure features no detail that puts the public in possession of anything that is not already known. The idea of a patent is to provide the public with new information in exchange for patent protection. How is can the Examiner say that the features that the applicant is arguing are allowable are patentable over Jannu even though the applicant has not disclosed anything specific about these features? The applicant argues that Jannu does not teach a bus-specific receiving object that can relay incoming messages, monitor access to a particular bus, and that features routing tables. As explained, Jannu could not function without these features. Is the applicant trying to say that Jannu is not routing messages or that it is possible to route messages without a routing table? Neither makes sense to the Examiner. To further prosecution, the applicant needs to explain what the novelty is supposed to be of the applicant's invention. The applicant needs to explain how a bus-specific receiving object is

different than the teachings of Jannu relied upon by the Examiner instead of just insisting there is a difference.

In response to the traversal of Official Notice, the Examiner is not sure what the applicant is referring to. 35 USC section 103 is relied upon to show that there is no novelty in putting something into a vehicle. This rejection is based on case law cited in the MPEP and not Official Notice. All other limitations are anticipated by Jannu and the Examiner is not responsible for the applicant's either unwillingness or inability to understand the rejection. The Examiner is not arguing that Jannu could have a routing table. The Examiner is saying that Jannu must have a routing table. According to the MPEP section 2112(IV) evidence only needs to be supplied in situation where a characteristic may occur and not when it must occur. Therefore the applicant needs to explain how Jannu could function without a routing table and then the Examiner would have to supply evidence. That said, arguing that a routing table distinguishes over the prior art when the applicant has not disclosed anything novel about a routing table will not further prosecution.

#### ***Claim Objections***

Claims 10, 12, 16, and 18 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Number 7,152,094 to Jannu et al.

Claims 8-23 are rejected as previously indicated.
